There are many more educational technology resources at:

<http://clla.tamu.edu/technology>

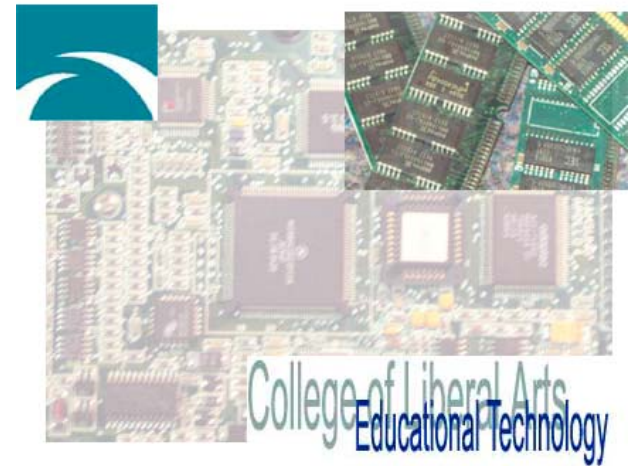

The site is an annotated “best of the best” guide to educational technology and instructional methods web sites that is organized from basic to advanced topics

If you have questions like:

- How do I build my own web page?
- How do I get students to participate online?
- What technology is useful for teaching out there and how do I use it?
- How can I change some of my teaching strategies and methods to make the most of educational technology?
- Is there grant money out there to develop any of this?

Then there are resources published by experts from all over the world available at:

Helping Faculty and Graduate Students...

Texas A&M University has many resources for faculty, graduate student who teach, and other instructors who want to use more educational technology.

The chart at the right lists the eight principle offices that can help you. The contact information for each office is listed below. With the exception of custom programming, everything to the right is free.

More information about these and other services can be found at:

<http://itsinfo.tamu.edu>

There is even more information about other resources, grants, existing technology applications and more at:

<http://ccla.tamu.edu/technology>

Additionally, faculty in the College of Liberal Arts are invited to apply for the Liberal Arts *Summer Institute for Instructional Technology Innovation* (SIITI). Applications are due just after Spring Break. Accepted applicants receive a professional bursary and hands-on training to help make their instructional technology dreams a reality.

Please email Stephen Balfour at balfour@tamu.edu for more information.
